PROFESSIONAL SUMMARY

Artificial Intelligence C Data Science undergraduate with hands-on experience building machine learning systems, real-time collaborative web applications, and full-stack software using Python, React, and Django. Strong foundation in data preprocessing, model development, and scalable backend systems. Passionate about solving practical problems through AI-driven solutions and production-ready applications.

TECHNICAL SKILLS

Languages: Python, Java, C, SQL

Web s Backend: React, Django, REST APIs, WebSockets, MERN Stack

Machine Learning s Data Science: Pandas, NumPy, Scikit-learn, Data Preprocessing, Model Training, Feature Engineering

Databases s Tools: MongoDB, Git, Tableau, Redis, Vercel, Streamlit

PROJECTS

EEG-Based Emotion Classification s Eye State Detection | Python, Scikit-learn, Streamlit | 2025

- Built an end-to-end machine learning system to classify human emotions and detect eye state using EEG signal datasets
 - Performed preprocessing, normalization, and feature scaling to improve model reliability
 - Implemented Random Forest classifiers achieving **87% emotion classification accuracy** and **86% eye-state detection accuracy**
 - Developed an interactive **Streamlit dashboard** enabling real-time prediction and visualization
 - Deployed the full application to cloud for remote usage
-

CollabBoard – Real-Time Collaborative Whiteboard | React, Django, WebSocket, Redis | 2025

- Designed and developed a **multi-user real-time collaborative whiteboard** supporting simultaneous drawing sessions
- Implemented WebSocket communication using **Django Channels** for instant synchronization between users

- Built drawing tools, undo/clear functions, and persistent board storage
- Developed backend REST APIs and optimized canvas rendering with React-Konva
- Supported concurrent users with low-latency updates and stable performance

EDUCATION

KL University, India

B.Tech in Artificial Intelligence C Data Science

Expected Graduation: 2028
